Particulate Respirator 1970EU
Layfield Medical Products

Contraindications
- This respirator is designed for adults who can fully understand the User Instructions. It is not designed to be used by children or patients.
- If you smell or taste contaminant.
- Atmosphere contains less than 19.5% oxygen.
- For sandblasting, paint-spray operations and asbestos.

Use Instructions
- Wash your hands with soap and water or perform hand hygiene as recommended.
- Place respirator under chin and position on face.

Fitting Instruction
- Wash your hands. Pull the ear loops to open the mask.
- Flatten the nose bridge wire and gently curve to form a nose shape.
- Place respirator under chin and position on face.
- Pull the strap over your ears. Position the mask as comfortably.
- Use fingertips to shape the nose wire to the bridge of your nose. Start at the top and move downwards. It is very important to press the nose piece firmly to the bridge to form a good seal. Pinch the nose piece using one hand, and move downwards. If too tight, you may not feel comfortable.
- Your mask should have a good fit at the chin and cheeks. Make sure hair, facial hair, jewelry and clothing are not interfering with the mask fit.
- Perform a Visual Seal Check. Without disturbing the position, cover the respirator with both hands. Exhale sharply. If air leaks around the edges of the respirator, adjust the position of the straps and ensure the respirator edges fit tightly against the face. If necessary, readjust nose piece and straps to form a good seal. You CANNOT achieve a proper seal, DO NOT enter the contaminated area. See your supervisor.
- Use the adjustment clip to achieve a better seal and to reduce pressure on the ears.
- If no leaks are detected, you are ready to work. Please continue to monitor the fit of your mask and obey all other instructions.

Removal Instruction
- Do not touch the respirator face.
- Slowly lift off any of the ear loops. Then lift the other remaining ear loop.
- Grasp according to your facility’s infection control policy and applicable regulations.
- Wash your hands with soap and water or perform hand hygiene as recommended.

Use Limitations
- This respirator provides protection against certain particles. It does not eliminate the risk of any infection or contracting any disease.
- Do not use when concentrations of contaminants are immediately dangerous to life and health, are unknown, or when concentrations exceed the allowed exposure limit or the limit according to any applicable standards or regulations, whichever is lower.
- This respirator can protect you from particulate entry through the nose and mouth. It cannot prevent entry through other ways such as eyes and skin which should be protected by other personal protective equipment(s).
- This respirator is designed for adults who can fully understand the User Instructions. It is not designed to be used by children or patients.
- Persons having problem(s) with the respiratory system should consult a physician before use.

Disposal
- Dispose of respirator according to your facility or institution or employer policy, and local regulations.

Storage and Transportation
- Product should be stored in clean, dry conditions within the temperature range: –10°C to +40°C with a maximum relative humidity of <85%.
- Do not exceed maximum use concentrations established by regulatory standards.
- Do not touch the respirator face.
- Dispose of respirator according to your facility or institution or employer policy, and local regulations.
